Hobbels

- Competentie en status (binnen en tussen landen en organisaties)
- Commerciële belangen
- Registratie belangen (FDA)

- Oplossing: Lange weg; internationale aanpak

Alignment ambassador

6. NVvA update

- 6.1 Andrea is talking to Karen about IOHA presenting an OELs themed session at the NVvA conference. **Action: Andrea, Karen**
- 6.2 Theo Scheffers has approached IOHA with the suggestion to form an OEL/Control Banding working group to work on international standardisation. All agreed IOHA should support this as it is of global interest (indeed ANOH will be discussing OELs at their February meeting). IOHA might also produce a statement on this. Andrea will ask Theo to provide an invitation letter to be sent to member associations, for interested people to attend a small meeting during AIHce in Seattle. Roz will circulate the invitation and liaise with AIHA regarding the room. If it proves successful, IOHA could make it an official working group. **Action: Andrea, Roz**

Alignment of tools for workplace exposure assessment

IOHA 2015 Conference: The need for international alignment of Occupational Hygiene tools

NVvA Conference 2017: The alignment of parallel OH tools. An IOHA project?

2017 Toekenning buitenlandbeurs

AIHce 2017 Seattle: Testing Hazard Banding Performance and Strength

IOHA 2018 Washington: Progress in the alignment of control banding tools

Conclusion & Recommendations

- Current HB engines with 5 bands are over precise: 4 bands makes more sense
- Much room to improve HB-OELV relation; strength based method available!
- Claims that >10 different CB's supports SME's is unrealistic
- CB use should be discouraged if no mutual alignment is reached in say 3 years
- Possible solutions:
 - Alignment of I/OH tools must become a part of IOHA strategy
 - IOHA alignment ambassador ?
 - Alignment Award ?
 - support to align tools (EU-platform, ILO?)

A man with glasses and a dark jacket stands to the left of the screen, gesturing with his hands as he speaks. He appears to be the speaker for the presentation.

Initiative for a European Platform of professionals in Oc. Hygiene and chemicals.

Welcome to our 1rst (web)meeting

6th of june, 2017

EU IH Platform

3 technical topics and one strategical topic needing attention and further development:

- Hazard and Control banding strategies
- Carcinogenic and Mutagenic agents and skin exposure control
- Registration, Evaluation, Authorisation and restriction of Chemicals (REACH)
- Occupational Safety and Health (OSH)
Harmonization of education and training
